

**Thorough pursuit of lightness, safety and rigidity**  
**Easy-to-use highly expandable multi-functional platform**

■ **Designing for toughness**

Designing for toughness that foot step's ends and main rails are tightly connected (plane contact) each other, further given reinforce parts.

■ **Light-weighting and high rigidity**

The cross section of main rails is formed square pipe. Making lightness and rigidity compatible.

■ **Easy to keep platform level and easy maintenance**

The telescopic legs can be adjusted by 25 mm interval. Even on uneven floor, you can set up the platform kept right level. The section of lock devices has a safety cover. When a safety cover is closed you can automatically regard it as right and safe. The cover also serves to prevent intrusion of foreign materials into the device.

■ **Specifications**

Item No.	Platform area usable dimensions (mm)		Platform height (mm)	Pitch (mm)	Grounding dimensions (mm)		Folding dimensions (mm)			Brace (pcs)	Handle (pcs)	Weight (kg)	Allowable load (kN)
	W	D			W	D	W	D	H				
MB180F	1,680	500	1,417 ~ 1,777	25	2,510 ~ 2,703	767 ~ 832	1,775	767	165	4	4	26.4	1.47
